1. Introduction

Book Nook is a simple desktop application built using Python and Tkinter that lets you track books you've read, are currently reading, or plan to read.

2. System Requirements

- Operating System: Windows, macOS, or Linux
- Python 3.7 or higher
- Required Python packages:
- tkinter (included with most Python installs)
- Pillow (for image support)

3. Installation

- 1. Install Python from https://www.python.org/
- 2. Install Pillow:

pip install pillow

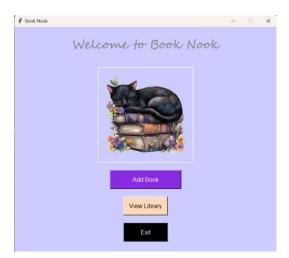

- 3. Download or clone the Book Nook project folder.
- 4. Ensure all required files are in the same folder:
 - main.py
- add_book.py
- view_library.py
- utils.py
- library.json (optional, will be created if not present)
- library_image.png
- main_book_image.jpg

4. Launching the App

Run the main program using:

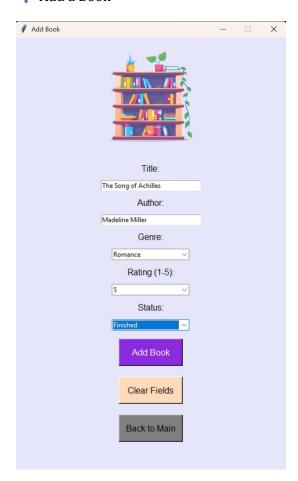

python main.py

This will launch the main window of Book Nook.

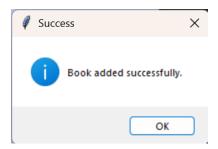

5. Features Overview

+ Add a Book

- Click the "Add Book" button on the main screen.
- Enter details: Title, Author, Genre, Rating, Status.
- Click "Add Book" to save the entry to your library. A pop-up window will confirm the successful submission.

- Click "Clear Fields" to clear all fields for a new entry.
- Click "Back to Main" to close window and return to main window.

View Your Library

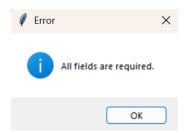

- Click the "View Library" button.
- A scrollable window displays all saved book entries.
- The window is resizable if needed
- Click "Back to Main" to return.

6. User Interface Walkthrough

- Main Window: Start screen with navigation buttons.
- Add Book Window:
- Input fields and dropdowns for book details.
- An image for visual flair (if available).
- Library Window:
- Grid layout showing all books.
- Scrollable if many books are listed.

7. Error Handling

- All fields must be filled when adding a book.
- Error messages will appear in a popup if submission fails.

- library.json will be created automatically if missing.

8. Frequently Asked Questions

Q: How can I scroll the library list?

A: The "View Library" window supports vertical scrolling when many books are present.

Q: Can I delete or edit a book?

A: Not in this version. Future updates may include this functionality.
